ANNOUNCEMENTS.

THE HERALD is authorized to announce

John N. Garner,

as a candidate for re-election to Congress from the Fifteenth Congressional District, subject to the action of the Democratic party.

THE HERALD is authorized to announce

John G. Willacy,

as a candidate for State Senator from the 32nd, Senatorial District, subject to the action of the Democratic primaries.

The Herald, Daily and Weekly, is the only paper published in Cameron county.

A LINE NEEDED.

Since the discontinuance of the military telegraph line up the river, there is no way of obtaining any news from that section. The recent rise in the river, and the almost total lack of information except from a few stations along the way, emphasize the absolute necessity of such a line. Our representative in congress, Hon. Jno. N. Garner, who has always proven himself a tireless worker for this section, should be requested to use his best efforts for the establishment of a telegraph line up the river in order that residents of the contiguous territory might at all times be informed of the condition of the river. This lack of information would prevent many losses, and THE HERALD hopes the matter will at once be taken up and strong pressure brought to bear to have a line established. Strong endorsements could be secured all along the river, and Hon. Mr. Garner would take pleasure in giving the matter his attention.

A TEXAS sheriff has been indicted because he alleges having traveled too far in one day. The indictment charges perjury.

THE president of the A. and M. College seems determined to keep that institution within the reach of the sons of our industrial classes; particularly near to the farming classes of the state. It is easy to raise the entrance requirements of a college or university until only the cream of the youth of the state, so far as preparation goes, is collected. But the sturdy young men from the rural districts, though not so well trained, may have the stamina of body and brain that will carry them forward in the race of life. They should not, therefore, be cut off from the opportunity to secure a higher education. The faculty of the college has arranged to take care of these young men by providing that approved candidates for entrance when over 18 years of age may be admitted without examination. Of course, if such men graduate they must work harder than their more fortunate companions who are better prepared.

A MAN from Wisconsin has become so badly scared in Mexico that he has left the republic, and is now spreading a sensational report that Americans are in danger in that republic. He is no doubt indulging in a pipe dream which a calm hour of reflection will make him ashamed of. Nobody believes our neighbors across the Rio Grande would harm American citizens there, and no attention should be paid to sensational reports like the one mentioned.

VICTORIA is puffed up with pardonable pride, on account of a fine artesian flow which has lately been struck in the heart of the city. The well flows 70,000 gallons per minute with prospects of an increase. Congratulations are due the City of Roses and we hasten to tender them.

THE county of Williamson must be about the warmest place in Texas just now. Indictments for perjury, violations of local option and politics all combine to engender the warmth.

THE brainiest man in the United States today—W. J. Bryan—says President Roosevelt is fixing things so he will be forced to run for a third term. Guess Bryan must be about right.

NUECES county is heralding to the world her first bale of cotton for 1906. We have several bales in Cameron county, so many that the matter has ceased to cause comment.

For the Housewife.

In her timely paper, in the August Delineator, Isabel Gordon Curtis has some remarks of interest and value on the proper making of Frozen Desserts, with a classification of them. Anna W. Morrison tells how to prepare Cool Salads for Hot Days and A. M. Calkins writes of innovations in salads, which will appeal to jaded appetites. This is the season for the enjoyment of the inviting field mushroom and Margaret Hall, in the article entitled "The Luscious Field Mushroom," gives many tested recipes for their preparation. Tomatoes take first place as vegetables for the Summer table, and suggestions for utilizing them are also given. During the "dog days," one will find that the serving of fancy iced beverages will furnish a happy combination of both food and drink. With this consideration in view, many selected recipes are suggested in the article entitled "Cold Comforts," by Eleanor Marchant.

Leave it to Him.

When you want a good job of printing done just take your copy to a printer and tell him to do you a good job, and he will do it. If you think you know more about the business than he does and select your paper and instruct him what type to use and all the little details you will get a botch job. A printer working under instruction from one who knows nothing about the business, no matter if he is an expert, can not get out a neat job.—Yoakum Times.

Wealth of Nations.

The latest estimate of national wealth by a competent authority was recently given before the British income tax committee by Mr. Mallet, one of the commissioners of inland revenue. Mr. Mallet placed the nation's income at \$9,000,000,000, against the \$3,500,000,000 of Prussia. The capital of the United Kingdom he estimated as \$42,500,000, which was double that of France and four times that of Italy.

According to his estimate, the number of persons possessed of fortunes of over \$200,000 was, in the United Kingdom 30,000, in France 15,000, in Prussia 11,000 and in Italy 1,500.

An Englishman with an income of \$5,000 pays \$250 income tax; a Prussian pays \$212.50 on \$5,000 of unearned income and \$150 in case of earned income.

The wealth of the United States cannot be estimated from any official source, but at the observed ratio of increase noted in 1900 it cannot well be less than \$110,000,000,000, and is probably considerably greater.—New York World.

Would Welcome an Exchange.

When Senator Bailey was making his speech on his amendment to the Hepburn bill a party of New York sightseers sat in one of the galleries. They listened to the Texan for a time and then one of them whispered to their Washington friend who was showing them around: "Where are the New York senators? We want to see them." "They are not here," was the reply. "Depew is in a sanitarium and Platt is too feeble to sit here for a long time and listen to anybody talk." The New Yorker said nothing and listened to Bailey, for a time longer. Then he sighed and remarked: "Gee! Wouldn't New York be lucky if she could trade off Platt and Depew for Bailey?"

Why Worry Kills.

Every one knows innumerable reasons why it is foolish to worry, the chief one being, perhaps, that it is so utterly useless, but science has added a new reason which is worth considering. It not only states that worry will kill, but explains why it will kill. Worry is a disease of the brain, a disease which destroys certain cells of the brain, often beyond repair. Like an enemy in the night, worry creeps upon the brain and begins its sledge-hammer process of destruction. The vitality of the delicate organism is slowly destroyed. Nature may repair the destruction if worry comes at intervals, but worry is a habit and its power grows each time it is allowed admittance.—Selected.

Ginger Cakes.

Mix and sift together six cups of flour, two tablespoonfuls of ginger, one tablespoonful of cinnamon and one tablespoonful of soda. Heat one-half cup lard or butter, one cup of molasses and one cup of brown sugar until boiling. Take from the fire, and add one cup of sour cream and pour gradually into the flour mixture, beating until smooth. Pat and roll out; cut into small cakes, and bake in a moderate oven.—Ex.

Still Texas Grows.

Eight hundred families have settled on the public lands alone of West and Southwest Texas in the past eight months. Many times that number have been brought into the state in the same interval by the railroad immigration departments and private land colonization companies. Texas, especially Southwest Texas is growing by leaps and bounds.—Express.
